

Dr. Krishnan Suthanthiran, President/Founder of Best Cure Foundation, Announces Launch of Two International Societies

Over the past 50 years, many new imaging modalities have been invented, promoted, and are available globally. Most of these are focused in North America and Europe even though only a small fraction of the world's population reside in these two continents.

Dr. Suthanthiran just completed his 51st year in Medicine and Oncology. During his career, he has traveled to over 20 countries and conducts business in even more. He has witnessed the good, the bad, and the ugly side of medicine throughout the world. In light of his vast in-

ternational experience, he is delighted to announce the establishment of the **International Society of Radiation Medicine & Molecular Imaging (ISRMMI)** and the **International Society of Therapeutic Radiology and Oncology (ISTRO)**. ISRMMI is excited to launch all of the new modalities of molecular imaging and Theranostics, as well as the promising future prospects of Targeted Systemic Radiation Therapy. These advancements bring about significant improvements in clinical outcomes at a more affordable cost.

Many associations today concentrate mainly on the advanced economies of G7 nations even though over 90% of the global population lives outside of G7 nations. ISRMMI is committed to ensuring that everyone worldwide has access to advanced technologies, diagnosis, and treatment.

ISRMMI and ISTRO are divisions of Best Cure Foundation

ISTRO's mission is to educate the public, medical and insurance professionals, and Government officials/elected members alike, to make the conversation around oncology more transparent.

ISTRO plans to begin organizing conferences and technical exhibits to highlight incredible breakthroughs in the field of Oncology/Medicine. Additionally, ISTRO is looking to collaborate with various professional medical societies on awarding more than 100 individuals who have demonstrated extraordinary work each year. ISTRO will publish free educational online journals.

Through its parent organization, Best Cure Foundation, ISTRO is looking to help establish evidence-based Proactive, Preventive, Primary, and Dental Care Wellness Centers as well as a Best Cure Health System of Express and Mobile Clinics linked to general and multi-specialty medical centers.
